The Louisiana State University Agricultural Center, School of Renewable Natural Resources in Baton Rouge, Louisiana has an M.S. assistantship available beginning in the fall of 2020. The assistantship is half-time and carries a stipend of $20,000, tuition, and health insurance.

**Project:** The successful candidate will work on a cooperative project between the Louisiana State University Agricultural Center and IFCO Seedling Company to explore the physiological processes that govern growth of loblolly pine genotypes from all portions of the species’ natural range across a gradient of climate and site conditions.

**Qualifications:** Applicants should have an undergraduate degree in forestry, biology, natural resources management, ecology, or related fields from an accredited institution. Successful applicants generally have undergraduate grade point averages of at least 3.25 and a minimum combined verbal/quantitative GRE score of 300. More information on the LSU School of Renewable Natural Resources graduate program is available at [http://www.rnr.lsu.edu/academics/grad/rnr_masters.htm](http://www.rnr.lsu.edu/academics/grad/rnr_masters.htm)
