Graduate student assistantship in ecosystem ecology at the University of Alaska Fairbanks

Dr. Tamara Harms’ ecosystem ecology & biogeochemistry lab in the Department of Biology & Wildlife (http://www.bw.uaf.edu/graduates/index.php) at the University of Alaska Fairbanks is recruiting a graduate student. Potential thesis projects would address catchment biogeochemistry and/or stream metabolism in response to climate change, permafrost thaw, and fire in the boreal forest of Alaska. See harmslab.org for further description of current research in the lab.

Prospective students should contact Dr. Harms (tamara.harms@alaska.edu) and include a brief description of research interests, experience, and academic preparation. Applicants should have strong academic backgrounds in natural science, prior research experience, and demonstrated interests in ecosystem ecology or biogeochemistry.
