The Farrer Lab in the Department of Ecology and Evolutionary Biology at Tulane University is currently recruiting a PhD student to begin Fall 2022. The research will focus on investigating the impacts of climate change on plant-microbe interactions and species coexistence in coastal wetlands. Previous experience in molecular/microbial work, field experimentation, and statistics preferred, but not required. Position is funded through a combination of research and teaching assistantships. Underrepresented minority students are strongly encouraged to apply.

Interested applicants should send a brief statement of interest, CV, and names and email addresses for 3 references to Emily Farrer: efarrer@tulane.edu.

For more information on the grad program see: https://sse.tulane.edu/eebio/academics/graduate/apply-online

**Application deadline is Dec. 1.**
