

The HART Lab (<https://hartlab.wiscweb.wisc.edu/>) at the University of Wisconsin-Madison is seeking a postdoctoral scientist with a background in remote sensing and forest ecology. The successful candidate will analyze time series of Landsat imagery to understand changes in ecosystem structure and function through time. This position is available for start in Fall 2019 with support for two years.

Competitive applicants will have experience with remote sensing, strong computational/statistical skills, and interests in disturbance ecology. Strong written and verbal communication are also desired. A PhD in ecology, geography, or a related field is required. Interested applicants should fill out the recruitment survey available here: [https://uwmadison.co1.qualtrics.com/jfe/form/SV\\_b8XGcVs5sPm8P77](https://uwmadison.co1.qualtrics.com/jfe/form/SV_b8XGcVs5sPm8P77).

Please contact Dr. Sarah Hart ([sarah.hart@wisc.edu](mailto:sarah.hart@wisc.edu)) with questions.
