

Explore **old** and **primary** forests in Czechia and Europe!

PhD positions at the Department of Forest Ecology CZU Prague

We are interested in the value of old managed forests regarding:

- **Biodiversity** of different groups of organisms (birds, beetles, fungi, plants, lichens...)
- **Carbon sequestration** (we want to do tree ring analyzes and find out the real age of trees)
- **Tree layer dynamics** (we want to measure the structure and species composition of forests)

We search: motivated people, who are not afraid of **field work**, can communicate and publish in **English**, analyze **data**; have/will complete/d master studies in ecology/biology/environmental sciences/forestry/etc.

We offer: basic scholarship 22 000 CZK (+bonuses); energetic young collective; meaningful and interesting topic

You can start almost immediately (May–October 2023).

More information and applications by email.

Attach your CV and a short motivation letter to your application.
